SUMMARY

Junior JavaScript Developer and Full-Stack Developer with hands-on experience building responsive front-end interfaces using JavaScript/TypeScript, HTML5, CSS3 and modern frameworks such as React and Next.js, and connecting them to back-end services and RESTful APIs built with Java/Spring Boot and PHP/Laravel. Solid foundation in software engineering from intensive full-stack training, with a strong focus on clean code, front-end development and API integration. Fast learner, detail-oriented and motivated by cybersecurity best practices and AI-assisted development. Looking to bring a proactive, collaborative attitude to a front-end or full-stack development team.

TECHNICAL SKILLS

Front-End: JavaScript (ES6+), TypeScript, HTML5, CSS3, React, Next.js, Vue.js, TailwindCSS, Bootstrap

Back-End & APIs: Java, Spring Boot, PHP, Laravel, Symfony, RESTful API design and integration, Thymeleaf

Databases: SQL, MySQL, PostgreSQL

Tools: Git/GitHub, npm, Maven, Composer, Docker (Basic)

PROFESSIONAL EXPERIENCE

Software Developer Intern

IT Salnes

Jan 2025 – Mar 2025

- Developed full-stack features in Java and Spring Boot with Thymeleaf templating, streamlining server-side rendering across 10+ application views.
- Built and styled responsive front-end UI components with JavaScript (ES6+), HTML5, CSS3 and Bootstrap for 8+ pages, improving usability across desktop and mobile.
- Implemented front-end logic and data binding for 6+ Thymeleaf-based forms, reducing manual validation code and improving data consistency.

Java Developer Intern

SDWEB – Innovative Digital Solutions

Apr 2023 – Jun 2023

- Developed and maintained Java back-end modules with JavaScript-based front-end integration, contributing to 5+ core application features.
- Wrote and optimized 20+ SQL queries for data manipulation, retrieval and integrity checks, improving performance of the application's database layer.

Data Management Specialist

Viajes InterRías

Apr 2021 – Jun 2021

- Managed supplier communications and processed high-volume data entry (~100 records per week), organizing datasets for database integration and reporting while maintaining high accuracy.

PROJECTS

NorthGZ – E-commerce / Sales Platform

Tech stack: React, JavaScript (ES6+), HTML5, CSS3, Laravel (PHP), REST API

- Developed a full-stack web platform for online sales, building a React front-end (JavaScript, HTML5, CSS3) connected to a Laravel back-end.
- Designed and implemented RESTful API endpoints in Laravel to manage product and order data, consumed by the React front-end for a dynamic single-page experience.
- Built reusable React components for product browsing, navigation and the shopping cart, with responsive, mobile-first layouts.

Personal Portfolio Website

Tech stack: Next.js, React, TypeScript, TailwindCSS, Resend API

- Designed and built a personal portfolio website with Next.js, TypeScript and TailwindCSS, featuring a fully responsive, accessible layout to showcase projects and skills.
- Integrated the Resend API to implement a working contact form, enabling visitors to send emails directly from the site.
- Structured the project with reusable TypeScript components and a mobile-first design system built on TailwindCSS utility classes.

EDUCATION

Higher National Diploma (HND) in Multi-platform Applications Development (DAM)

IES San Clemente

Sep 2023 – Mar 2025

Higher National Diploma (HND) in Web Applications Development (DAW)

IES San Clemente

Sep 2021 – Jun 2023

Vocational Training in Microcomputer Systems and Networks (SMR)

IES Monte da Vila

Sep 2019 – Jun 2021
